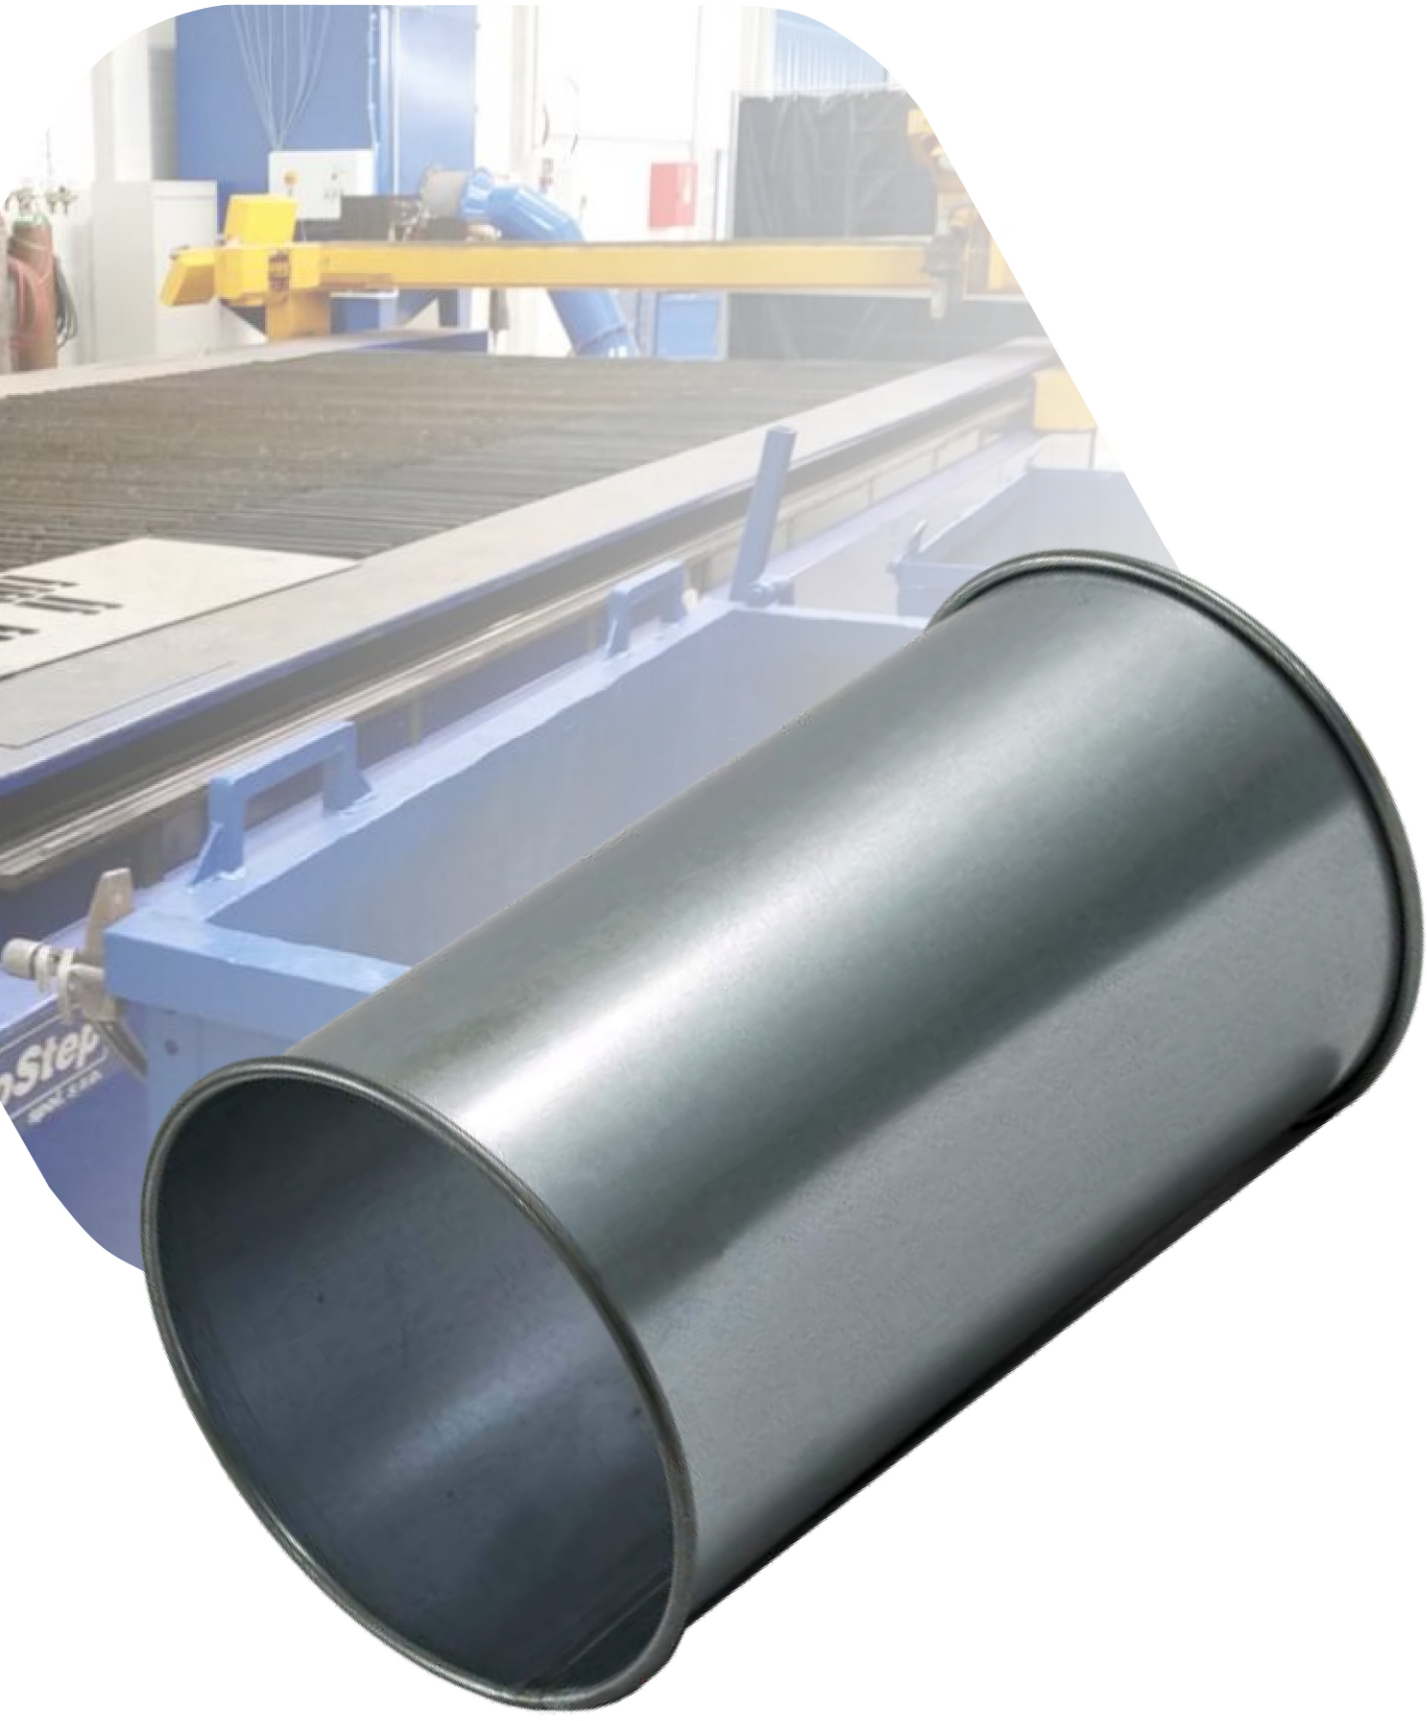
Gebläserohre
Pipe with beaded flange



Gebläserohre mit Wulst

Gebläserohre mit Wulst werden hauptsächlich für den pneumatischen Transport von leichtem Gut wie beispielsweise Heu, Stroh und Silage eingesetzt.
Durch das Wulstsystem haben die leichten Rohre eine erhöhte Steifigkeit und können mittels des Schnellverbinders verbunden werden. Die Gebläserohre sind in den Durchmessern von 250-630 mm erhältlich.

Vorteile:
- absolut runde Geometrie
- Wulstverbindung
- sendzimirverzinkt
- längsgefalzt

Pipes with beaded flange

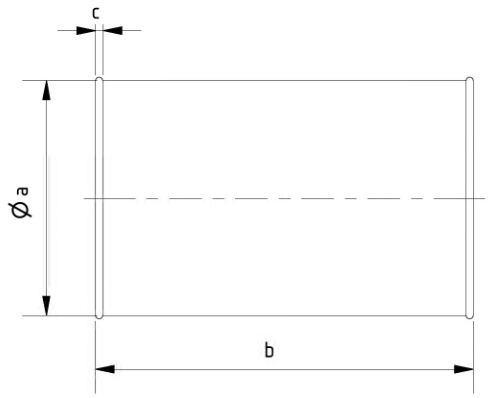
Pipes with beaded flange are mainly used for the pneumatic transport of light goods, such as hay, straw and silage. Due to the beaded flange system the pipes have an increased stiffness and can be easily connected via clamping rings.
The pipes with beaded flange are available in diameters from 250-630 mm.

Advantages:
- superior roundness
- beaded flange connection
- sendzimir galvanized
- horizontal folded

Gebläserohre

Pipe with beaded flange

Gebläserohr mit Wulst Nennlänge 500
Pipe with beaded flange nominal length 500



- absolut runde Geometrie
- Wulstverbindung
- sendzimirverzinkt
- längsgefalzt

- superior roundness
- beaded flange connection
- sendzimir galvanized
- horizontal folded
